

IN THE SPECIFICATION:

The Examiner brought to the attention of the Applicants that their attempt to incorporate essential material in the specification by reference to a foreign application or patent is improper. The Applicants were required to amend the disclosure to include the material incorporated by reference, to be accompanied by an affidavit or declaration executed by the Applicants, or a practitioner representing the Applicants, stating that the amendatory material consists of the same material incorporated by reference in the referencing application. Being filed herewith Applicants are tendering an amended page 1 and 1a in which the Applicants have inserted material taken from the two foreign patents incorporated by reference in the original application, as filed. Also enclosed is a Declaration of a practitioner representing the Applicants, stating that the amendatory material consists of the same material incorporated by reference in the referencing applications.
